

Rooftop Solar Regulations of States / UTs as on February 2026													
Sr. No.	State/UT	Metering Arrangement	Capacity Limits (Min-Max)	RTS capacity Allowed (% of contracted demand)	Eligible Consumers/Category	Feasibility Approval	DT Capacity/Hosting Restriction	Settlement Period	Settlement Methodology	Settlement Rate for Excess Generation	Requirement of Electrical License of RTS installation	Additional Charges/ Fee	Additional Information
1	Andhra Pradesh	Net Metering	1 kWp - 500 kWp	100% of contracted demand	All Consumers	Deemed approved for upto 10 kW capacity	80% of DT rated capacity	Monthly (Units); Annually (Payment)	Energy settlement (units) monthly; adjustment againsts peak/off-peak/normal hrs if ToD applicable; Monetary value adjustment/ payment monthly at FIT	Fixed Feed-in-Tariff (FIT): Rs. 2.09/unit	No	T&D losses deducted	Application fee waived off upto 10 kWp metering agreement needs to be executed physically.
		Group Net Metering	1 kWp - 500 kWp	100% of contracted demand	All Consumers (multiple services of individual consumer)	Deemed approved for upto 10 kW capacity	80% of DT rated capacity	Monthly (Units); Annually (Payment)	Energy exported adjusted in consumption of multiple services located within the same Electricity Revenue Office (ERO). adjustment against ToD slots, in case of TOD. Monetary value adjustment/payment monthly. T&D and distribution/wheeling (waive off, in case of drawell at same voltage) losses deducted.	Fixed FIT: Rs. 2.09/unit	No	and distribution/wheeling (waive off, in case of drawell at same voltage)	
		Virtual Net Metering	5 kWp - 500 kWp	100% of contracted demand	Group of prosumers/society (located within the same ERO)	Deemed approved for upto 10 kW capacity	80% of DT rated capacity	Monthly (Units); Annually (Payment)	Energy allocated based on share (units) monthly; adjustment against ToD slots, in case of TOD. Monetary value adjustment/payment monthly. T&D and distribution/wheeling (waive off, in case of drawell at same voltage) losses deducted.	Fixed FIT: Rs. 2.09/unit	No	and distribution/wheeling (waive off, in case of drawell at same voltage)	
		Gross Metering	5 kWp - 5000 kWp	100% of contracted demand	All Consumers	Deemed approved for upto 10 kW capacity	80% of DT rated capacity	Monthly (Billing Demand)	Monetary value of energy exported computed at FIT, adjusted against total billing demand.	Fixed FIT: LT: Rs. 3.13/unit; HT (up to 1500 kW): Rs. 2.92/unit; HT/EHT (up to 5000 kW): Rs. 2.71/unit.	No	T&D losses deducted	
		Net Billing or Net Feed-In	1 kWp - 1000 kWp	100% of contracted demand	All Consumers	Deemed approved for upto 10 kW capacity	80% of DT rated capacity	Monthly (Monetary Value)	Monetary value of imported energy @ retail tariff vs. exported energy @ FIT. Deducted to arrive at net bill.	Fixed FIT: Rs. 2.09/unit	No	T&D losses deducted	
2	Arunachal Pradesh	Net Metering	1 kW to 500 kW	Max: 100% (Equal to sanctioned load or contract demand)	All categories of consumers without pending arrears	Up to 10 kW: Deemed accepted. Others: Study within 15 days; LoA within 30 days	80% of DT rated capacity	Annual (Financial Year: April to March)	Energy exported (kWh) deducted from energy imported. Surplus units carried forward as credit	End-of-year surplus paid at APPC or Feed-in-Tariff (FiT), whichever is lower		Processing Fee: ₹500. Exempted from wheeling, banking, and cross-subsidy surcharges	Infrastructure Upgrades: Any augmentation of service lines or DT capacity required for the project is carried out by the licensee or consumer as determined during the feasibility study.
		Net Billing (Net Feed-In)	500 kW to 1000 kW	Max: 100% of sanctioned load/contract demand	All categories of consumers without pending arrears	Same as Net Metering	80% of DT rated capacity	Annual (Financial Year)	Monetary value: Imported units (@ retail tariff) minus Exported units (@ FiT). Net credit carried forward	Exported energy purchased at the Feed-in-Tariff (FiT) approved by the Commission		Same as Net Metering	No interest payable on carried-forward monetary credits
		Gross Metering	1 kW to 1000 kW	Max: 100% of sanctioned load/contract demand	All categories of consumers/prosumers and third-party owners	Same as Net Metering	80% of DT rated capacity	Monthly Billing Period (accounted separately)	Total consumption billed at retail tariff; total generation reimbursed at FiT. Net bill settlement	Reimbursed at the Feed-in-Tariff (FiT) determined by the Commission for that year		Same as Net Metering	Third-party owners must enter a specific agreement with the Distribution Licensee
		Group Net Metering (GNM)	1 kW to 500 kW	Max: 100% of individual sanctioned loads	Prosumers with multiple connections of the same name in the same licensee area	Same as Net Metering	80% of DT rated capacity	Annual (Financial Year)	Surplus injected adjusted against other connections per a priority list provided by the prosumer	Same as Net Metering (paid for connection where project is located)		Same as Net Metering	Priority list can be revised once per financial year with 2 months' notice
		Virtual Net Metering (VNM)	1 kW to 500 kW	Max: 100% of individual sanctioned loads	Participating prosumers within the same licensee area	Same as Net Metering	80% of DT rated capacity	Annual (Financial Year)	Entire energy generated is exported and credited to participants based on a procurement ratio	Same as Net Metering (calculated for each participant)		Same as Net Metering	Credit share ratio can be changed once per financial year with 2 months' notice
3	Assam	Net Metering	1 kWp - 10 kWp	100% of Connected Load / Contracted Demand	All eligible consumers	Deemed approved for upto 10 kW capacity	80% of DT rated Capacity	Monthly (Units); Annually (Payment)	Energy exported adjusted against consumption monthly.	APPC (for unadjusted units).	No	No Wheeling and Cross subsidy charges, if the injection and withdrawal of power are at the same voltage levels	Agreement signing required
		Group Net Metering	1 kWp - 1000 kWp	100% of Connected Load / Contracted Demand	All eligible consumers	Deemed approved for upto 10 kW capacity	80% of DT rated Capacity	Monthly (Units); Annually (Payment)	Energy exported adjusted against consumption monthly.	APPC (for unadjusted units).	No		
		Virtual Net Metering	1 kWp - 1000 kWp	100% of Connected Load / Contracted Demand	Domestic, Group Housing societies, Office of Government/local authorities, Hospitals, Colleges, Schools, Institutions run and managed by charitable institutions, non-profit organizations/trusts	Deemed approved for upto 10 kW capacity	80% of DT rated Capacity	Monthly (Units); Annually (Payment)	Energy credited based on procurement ratio monthly.	APPC (for unadjusted units).	No		
		Gross Metering	10 kWp and upto 1MWp	100% of Connected Load / Contracted Demand	All eligible consumers	Deemed approved for upto 10 kW capacity	80% of DT rated Capacity	Monthly (Units); Annually (Payment)	Energy exported sold to Distribution Licensee.	APPC (for injected units).	No		
4	Bihar	Net Metering	1 kWp - Sanctioned Load	100% of Sanctioned Load / Contracted Demand	Eligible Consumers	Deemed approved for upto 10 kW capacity (Draft Amendment 2024)	80% of DT rated Capacity	Monthly (Units); Annually (Lapse)	Energy exported credited monthly.excess carry forward to next billing cycle. Net consumption billed at applicable tariff.	Excess lapses at end of settlement period.	No		The Rooftop Solar power producer may install grid interactive solar power system with or without battery backup. Provided that if the Solar Energy Generator, prefers connectivity
		Gross Metering	1 kWp - Sanctioned Load	100% of Sanctioned Load / Contracted Demand	Eligible Consumers/Third party owners	Deemed approved for upto 10 kW capacity (Draft Amendment 2024)	80% of DT rated Capacity	Monthly (Billing Period)	Licensee pays for injected electricity.	Feed-in Tariff (FiT) approved by Commission for relevant year.	No		with battery backup (full load backup/partial load backup), in all such cases the inverter shall have separate backup wiring to prevent the battery/Solar power to flow into the grid in the absence of grid supply and manual isolation switch shall also be provided
5	Chhattisgarh	Net Metering	1 kW - 500 kW	100% of the connected load/sanctioned load	All categories of prosumers	Deemed Feasibility approval upto 10 kw capacity RTS	100% of DT rated Capacity	Annual (Financial Year)	Energy settlement (units) monthly; Annual purchase of unadjusted units.	Lowest solar/wind tariff discovered in preceding FY (for unadjusted units).	No	2%o of banked O21energy shall be payable in kind	Automatic load enhancement of consumer up to 10 Kw
		Group Net Metering	1 kW - 500 kW	100% of the connected load/sanctioned load	All consumers	Deemed Feasibility approval upto 10 kw capacity RTS	100% of DT rated Capacity	Annual (Financial Year)	Surplus units adjusted against prioritized connections monthly.	Lowest solar/wind tariff discovered in preceding FY (for unadjusted units).	No		
		Virtual Net Metering	1 kW - 500 kW	100% of the connected load/sanctioned load	Residential, GHS, Govt/Local Authorities	Deemed Feasibility approval upto 10 kw capacity RTS	100% of DT rated Capacity	Annual (Financial Year)	Energy credited based on procurement ratio monthly.	Lowest solar/wind tariff discovered in preceding FY (for unadjusted units).	No		
6	Delhi	Net Metering	Min: 1 kWp; Max: subject to sanctioned load	100% of the connected load/sanctioned load	All consumers who are buyers of electricity from a distribution licensee	Technical feasibility exempted up to 10 kW; for >10 kW approval within 15 days	Available DT capacity limits specified by Commission; licensees must update available capacity on websites	Monthly billing cycle; unadjusted credits paid at end of Financial Year	Exported energy adjusted against imported energy; surplus carried forward as energy credit	Paid at rates notified by the Commission at end of financial year	No	Exempted from wheeling, banking, and cross-subsidy charges for systems commissioned by 31/03/2027	No application/registration fees for domestic rooftop solar up to 10 kW under PM Surya Ghar: Muft Bijli Yojana
		Group Net Metering	Ground-mounted: up to 5× sanctioned load (max 10 MW); Rooftop: No capping	Linked to sanctioned load for ground-mounted systems	All consumers in NCT of Delhi	3-tier process: Feasibility Analysis, Registration, and Connection Agreement	As per Net Metering G	Monthly billing cycle	Surplus energy from one connection adjusted against other connections of same consumer in prioritized sequence	Paid at end of financial year As per Net Metering Guidelines, 2014	No	Exempted from wheeling, banking, and cross-subsidy charges (100% until 31/03/2027; then 25% until 2030)	Energy credits accounted during normal time block for both ToD and Non-ToD consumers

Rooftop Solar Regulations of States / UTs as on February 2026													
Sr. No.	State/UT	Metering Arrangement	Capacity Limits (Min-Max)	RTS capacity Allowed (% of contracted demand)	Eligible Consumers/Category	Feasibility Approval	DT Capacity/Hosting Restriction	Settlement Period	Settlement Methodology	Settlement Rate for Excess Generation	Requirement of Electrical License of RTS installation	Additional Charges/ Fee	Additional Information
		Virtual Net Metering	Ground-mounted: up to 5x sanctioned load (max 10 MW); Rooftop: No capping	Linked to sanctioned load for ground-mounted systems	All consumers of NCT of Delhi, including those with single-point supply	3-tier process: Feasibility Analysis, Registration, and Connection Agreement	As per Net Metering	Monthly billing cycle	Total generated energy exported and credited to participating consumers' bills based on pre-agreed ratio	Paid at end of financial year As per Net Metering Guidelines, 2014	No	Exempted from wheeling, banking, and cross-subsidy charges (100% until 31/03/2027)	Participating consumers can add new connections or change share twice per financial year with 2 months' notice
7	Gujarat	Net Metering	1 kW - 1000 kW	No Restriction. Allowed irrespective of consumer sanctioned load.	Eligible Consumers/Prosumers	Deemed Feasibility approval upto 10 kw capacity RTS	100% of DT capacity	Billing Cycle (2 months)	Energy offset on billing cycle basis.	Rs 2.25/unit (first 5 yrs), then 75% of average bidding tariff.	No	No Banking charges shall be applicable on solar power consumed by Residential Consumers.	Deemed Connectivity agreement for RTS under PMSG, No separate agreement required between DISCOM & Consumer
		Gross Metering	>10 kW - 1000 kW	No Restriction. Allowed irrespective of consumer sanctioned load.	Eligible Consumers/Prosumers	3 days from receipt of duly completed application to GEDA	100% of DT capacity	Billing Cycle	Energy consumed billed at retail tariff; generated paid at FIT.	FIT determined by Commission.	No		
8	Haryana	Net Metering	1 kWp - 500 kW	100% of the connected load/sanctioned load	All consumers except Agriculture / Government organizations/ institutions	Deemed Feasibility approval upto 10 kw capacity RTS	50% of DT rated capacity; 30% of power transformer capacity	Annual (Financial Year)	Energy set off monthly, In case of ToD, the energy exported will be offset in same time block; unadjusted excess energy paid off through 90% of FIT	Excess lapses annually;	No	exempted from all wheeling, cross subsidy, transmission and distribution, and banking charges and additional surcharges. However, statutory duties/cess, if applicable shall be payable	Agreement signing required
		Gross Metering	1 kWp - Sanctioned Load	100% of the connected load/sanctioned load	All consumers except Agriculture / Government organizations/ institutions	Deemed Feasibility approval upto 10 kw capacity RTS	50% of DT rated capacity; 30% of power transformer capacity	Monthly (Billing Cycle)	Separate transactions at Fixed FIT: Rs. 3.11/kWh (fixed for 5 years).; Licensee reimburses Prosumer for injected electricity.	Fixed FIT: Rs. 3.11/kWh (fixed for 5 years).	No		
9	Himachal Pradesh	Net Metering	Max: 50 kWp	10 kW or less: 10 kW capacity (deemed load enhancement allowed). Exceeding 10 kW: 50% of load or 10 kW, whichever is higher. Two-part tariff: Max 80% of contract demand.	Eligible Consumers/ Prosumers.	Up to 10 kW: No technical feasibility required (Deemed approved). >10 kW: Study completed within 15 days.	30% of DT rated capacity. Licensee must maintain 30% redundancy.	Annual (12 months starting from 16th March).	Energy exported is deducted from energy imported (units: kWh/kVAh). Surplus units carried forward within the settlement period.	Domestic (post-15.11.2018): 30% of weighted average rate of ground-mounted solar plants (up to 5 MW). Non-Domestic: Zero rate.	No	Exempted from wheeling, banking, and cross-subsidy charges. Low Voltage Supply Surcharge applies if voltage is below standard.	Deemed load enhancement requires additional security deposit. Solar meter mandatory (0.2s class).
		Net Billing	> 50 kWp to 1 MWp	Subject to supply voltage limits (e.g., HT/EHT up to 1 MWp).	Prosumers	Technical feasibility study within 15 days.	Based on transformer capacity and system adequacy.	Annual (12 months starting from 16th March).	Import and export recorded separately. Monetary value of exported energy adjusted against imported energy bill.	50% of weighted average rate of ground-mounted solar plants (up to 5 MW). Rate reduced to 15%-40% if subsidy > 50%.	No	Exempted from wheeling, banking, and cross-subsidy charges. Low Voltage Supply Surcharge applies if voltage is below standard.	Unadjusted monetary value carried forward within the settlement period.
		Group Metering	> 20 kWp to 1 MWp	Sum total of eligibility of each individual participating consumer.	Group of consumers in the same building, on single-part tariff, fed from a common DT.	Subject to individual and cumulative capacity limits.	As per Net Metering guidelines.	Annual (12 months starting from 16th March).	Total solar injected (Gross meter) is allocated to participating consumers after deducting 9% energy for distribution system usage in kind.	Surplus energy credited to a participating consumer is settled as per Net Metering rates.	No	Exempted from wheeling, banking, and cross-subsidy charges. Low Voltage Supply Surcharge applies if voltage is below standard.	Requires a mutual agreement between consumers; the share can be changed once per financial year.
10	J&K (UT)	Net Metering	1 kWp- 500 kWp	100% of the connected load/sanctioned load	Eligible Consumer	Deemed Feasibility approval upto 10 kw capacity RTS	100% of rated capacity	Annual (Financial Year)	Energy settlement (units) monthly, if TOD applicable, the offset will be done in same time block; Annual purchase of unadjusted units.	APPC or FIT, whichever is lower.	No	RE projects under these regulations shall be exempted from charges in respect of banking of electricity	Physical agreement
		Net feed in / Net Billing	1 kWp - 1 MWp	100% of the connected load/sanctioned load	Eligible Consumer	Deemed Feasibility approval upto 10 kw capacity RTS	100% of rated capacity	Annual (Financial Year)	surplus energy accounting based on FIT and adjusted with value of energy imported by the consumer. At the end of year, unadjusted amount will be paid by licensee to consumer.	FIT	No	RE projects under these regulations shall be exempted from charges in respect of banking of electricity	Physical agreement
		Group Net Metering	5 kWp - 500 kWp	100% of the connected load/sanctioned load	All Eligible Consumers	Deemed Feasibility approval upto 10 kw capacity RTS	100% of rated capacity	Annual (Financial Year)	Surplus units adjusted against prioritized connections monthly, if ToD applicable, the adjustment will be done in same time block. Annual purchase of unadjusted units.	APPC or FIT, whichever is lower.	No	RE projects under these regulations shall be exempted from charges in respect of banking of electricity	Physical agreement
		Virtual Net Metering	5 kWp - 500 kWp	100% of the connected load/sanctioned load	Residential, GHS, Govt/Local Authorities	Deemed Feasibility approval upto 10 kw capacity RTS	100% of rated capacity	Annual (Financial Year)	Surplus units adjusted against prioritized connections monthly, if ToD applicable, the adjustment will be done in same time block. Annual purchase of unadjusted units.	APPC or FIT, whichever is lower.	No	RE projects under these regulations shall be exempted from charges in respect of banking of electricity	Physical agreement
		Gross Metering	1 kWp - upto 1 MWp	100% of the connected load/sanctioned load	All Eligible Consumers	Deemed Feasibility approval upto 10 kw capacity RTS	100% of rated capacity	Monthly (Billing cycle)	surplus energy accounting based on FIT and adjusted with value of energy imported by the consumer.	FIT	No	RE projects under these regulations shall be exempted from charges in respect of banking of electricity	Physical agreement
11	Jharkhand	Net Metering	1 kWp to 2 MWp	100% of Sanctioned Load/Contract Demand. Domestic: Installed capacity is irrespective of sanctioned load.	All eligible consumers in the area of supply.	Up to 10 kWp: Deemed accepted without technical feasibility study. Others: 15 days (up to 30 if interconnection study required).	100% of DT rated capacity or other percentage fixed by the Commission.	Annual (Financial Year: April to March).	Energy exported is offset against energy imported. Surplus is carried forward as an energy credit within the settlement period.	Paid at the end of the settlement period at rates notified by the Commission in its Tariff Order.	No	Exempted from wheeling, banking, and cross-subsidy charges.	No application fees if applied through PM surya Ghar National Portal; agreement execution may be waived. Check meter mandatory for >50 kWp.
		Gross Metering	1 kWp to 2 MWp	100% of Sanctioned Load/Contract Demand.	All eligible consumers and third-party owners.	Same as Net Metering.	100% of DT rated capacity.	Monthly settlement.	Entire energy generated is injected into the grid. Licensee pays Solar Injection Compensation for the total quantum.	Rate notified by the Commission in its Tariff Order/Individual Order for the relevant year of commissioning.	No	Exempted from wheeling and cross-subsidy surcharge.	Third-party owners under gross metering must enter an agreement with the Distribution Licensee.
		Group Net Metering (GNM)	1 kWp to 2 MWp (General eligibility).	Subject to cumulative limits of participating connections.	Consumers with multiple service connections in the same area of supply.	Technical analysis within 7 working days; Agreement within 30 days.	As per Net Metering guidelines.	Annual (Financial Year).	Surplus energy injected is adjusted against consumption in other service connections of the same consumer per a prioritized sharing ratio.	Unadjusted credits at the end of the year paid at rates in the latest Tariff Order.	No	Exempted from wheeling, banking, and cross-subsidy charges.	Priority list and sharing ratio can be revised once per financial year with 2 months' notice.
		Virtual Net Metering (VNM)	1 kWp to 2 MWp (General eligibility).	Subject to cumulative limits of participating connections.	Participating consumers (e.g., in a society) within the same area of supply.	Technical analysis within 7 working days; Agreement within 30 days.	As per Net Metering guidelines.	Annual (Financial Year).	Entire energy generated is exported from a gross meter and credited to participating connections based on a pre-agreed procurement ratio.	Unadjusted credits at the end of the year paid at rates in the latest Tariff Order.	No	Exempted from wheeling, banking, and cross-subsidy charges.	Consumers can change their share ratio once per financial year with 2 months' notice.
12	Karnataka	Net Metering	Min 1 kW - Max 500 kW	100% of Connected Load / Contracted Demand	Eligible Consumers	Deemed Feasibility approval upto 10 kw capacity RTS under PMSG	90% of DT capacity	Annual (Financial Year)	Energy offset monthly. Excess lapses annually.	Without Subsidy ₹3.86/kWh for domestic 1–10 kW; ₹3.08/kWh for non-domestic With Subsidy 1kW to 2kW - ₹2.3/unit 2kW to 3kW - ₹2.48/unit >3kW - ₹2.93/unit	No		eliminate the requirement of PPA to be executed between the Consumer and the ESCOMs for the Distributed Solar PV Plant capacity with net/gross metering arrangement for LT Domestic Consumers upto 150 kW. hybrid grid tied inverter with the battery to the Distributed Solar PV plant. Allowed P2P allowed by eligible consumers under Net / Gross metering
		Group Net Metering	Min 5 kW - Max combined SL/CD	100% of Connected Load / Contracted Demand	Consumers of all categories (same name and same category)	Deemed Feasibility approval upto 10 kw capacity RTS under PMSG	Exempt if within same DT/11kV feeder	Monthly (Billing Cycle); Monthly (Payment)	Minimum 20% must be consumed by source plant meter other wise it will lapse, Surplus energy adjusted against prioritized connections, settlement in same time block as per ToD. Excess energy purchased monthly.	75% of generic tariff applicable to ground mounted Solar Power Projects/Distributed solar PV power projects (generic tariff = ₹3.07/kWh)	No	exempt consumers from these charges when the energy generated and consumed is within the same distribution transformer/11kV feeder.	The consumer opting for GNM shall install smart meter (s) at his cost, both at generation end and consumer metering point(s)
		Virtual Net Metering	Min 5 kW - Max combined SL/CD	100% of Connected Load / Contracted Demand	Domestic, GHS, Institutions, Govt. buildings/local authorities	Deemed Feasibility approval upto 10 kw capacity RTS under PMSG	Exempt if within same DT/11kV feeder	Monthly (Billing Cycle); Monthly (Payment)	Surplus energy adjusted against prioritized connections, settlement in same time block as per ToD. Excess energy purchased monthly.	75% of generic tariff applicable to ground mounted Solar Power Projects/Distributed solar PV power projects (generic tariff = ₹3.07/kWh)	No	exempt consumers from these charges when the energy generated and consumed is within the same distribution transformer/11kV feeder.	The consumers opting for VNM, shall install smart meter (s) at their cost, both at generation point and participation consumers' end.

Rooftop Solar Regulations of States / UTs as on February 2026													
Sr. No.	State/UT	Metering Arrangement	Capacity Limits (Min-Max)	RTS capacity Allowed (% of contracted demand)	Eligible Consumers/Category	Feasibility Approval	DT Capacity/Hosting Restriction	Settlement Period	Settlement Methodology	Settlement Rate for Excess Generation	Requirement of Electrical License of RTS installation	Additional Charges/ Fee	Additional Information
		Gross Metering	Allowed (No minimum, DISCOMs buys entire generation as per tariff	100% of Connected Load / Contracted Demand	Any consumer wanting to sell 100% generation to DISCOM	Deemed Feasibility approval upto 10 kw capacity RTS under PMSG	100% of DT rated capacity	Monthly (Billing Cycle); Monthly (Payment)	100% export of solar generation to grid; DISCOM purchases all exported units at KERC-approved generic tariff	Without Subsidy ₹3.86/kWh for domestic 1–10 kW; ₹3.08/kWh for non-domestic With Subsidy 1kW to 2kW - ₹2.3/unit 2kW to 3kW - ₹2.48/unit >3kW - ₹2.93/unit	No		Eliminate the requirement of PPA to be executed between the Consumer and the ESCOMs for the Distributed Solar PV Plant capacity with net/gross metering arrangement for LT Domestic Consumers upto 150 kW. P2P allowed by eligible consumers under Net / Gross metering
13	Kerala	Net Metering	Domestic: 1 kW-20 kW; Industrial: 1 kW-500 kW; Agriculture: 1 kW-3000 kW; common service area/ RWA: 1kW to 500kw	100% of Connected Load / Contracted Demand	Domestic, Industrial, Agriculture, Common Area of RWA/ High rise buildings	Deemed Feasibility approval upto 10 kw capacity RTS under PMSG	Not exceed 90% of DT capacity (max 30% per phase); 100% of HT feeder rated capacity	Annual (Financial Year)	Energy exported/imported offset based on zone-wise normalization factors during the solar hrs.Balance unit after year end, APPC/ FIT as decided by the Commission with 2% banking charges	APPC (Rs 3.08/kWh Solar) or FIT (Rs 2.79/kWh Solar).	No		> 10 kW to 20 kW- RTS, Hybrid inverter needs to be installed at 10% Or 20% storage as per guidelines. REGS seeking feasibility from 01.04.2027, having plant capacity above 5 kW and up to and including 10 kW, shall install hybrid inverters with a minimum storage capacity of 10% of the energy generation potential of the plant.
		Net Billing	Min 1 kW - Max 1000 kW (up to 3000 kW with 30% storage)	100% of Connected Load / Contracted Demand	All consumers	Deemed Feasibility approval upto 10 kw capacity RTS under PMSG	Not exceed 90% of DT capacity (max 30% per phase); 100% of HT feeder rated capacity	Annual (Financial Year)	Monetary settlement based on differential tariff (EDL x TRST) - (ERE x TRE).	FIT: Rs 3.07/kWh Solar (1.5x peak hours) or Rs 4.15/kWh Wind.	No	RTS installations under the PM Surya Ghar, the application fee and the registration fee shall be collected in the subsequent bill. 2% banking charges'	
		Gross Metering	Min 1 kW - Max 3000 kW	100% of Connected Load / Contracted Demand	All consumers/RE Generator	Deemed Feasibility approval upto 10 kw capacity RTS under PMSG	Not exceed 90% of DT capacity (max 30% per phase); 100% of HT feeder rated capacity	Monthly	Licensee pays generator for injected electricity.	FIT: Rs 3.63/kWh Solar (Rs 7.50/kWh peak hours with storage) or Rs 4.20/kWh Wind.	No	grid support charges shall be levied monthly, at the rates of 50 paise per kWh for the first 300 units and Re.1/- per kWh for the balance units	
		Group Net Metering	Min 10 kW - Max 1000 kW (or combined SL/CD)		Consumers eligible for Net Metering	Deemed Feasibility approval upto 10 kw capacity RTS under PMSG	Not exceed 90% of DT capacity (max 30% per phase); 100% of HT feeder rated capacity	Annual (Financial Year)	Energy adjustment based on priority list and zone-wise normalization factors (9% line loss deducted for HT/EHT).	APPC (Rs 3.08/kWh Solar) or FIT (Rs 2.79/kWh Solar).	No		
		Virtual Net Metering	Min 10 kW - Max 1000 kW (or combined SL/CD)		Domestic (multi-story, low income), Govt/LSGI, Agricultural	Deemed Feasibility approval upto 10 kw capacity RTS under PMSG	Not exceed 90% of DT capacity (max 30% per phase); 100% of HT feeder rated capacity	Annual (Financial Year)	Energy credit based on share and zone-wise normalization (losses deducted where applicable). In case of further excess energy, 2% bankingcharges will be levies	FIT: Rs 2.79/kWh Solar or Rs 2.87/kWh Wind.	No		
14	Ladakh (UT)	Net Metering	1 kWp- 500 kWp	100% of the connected load/sanctioned load	Eligible Consumer	Deemed Feasibility approval upto 10 kw capacity RTS	100% of rated capacity	Annual (Financial Year)	Energy settlement (units) monthly, if TOD applicable, the offset will be done in same time block; Annual purchase of unadjusted units.	APPC or FIT, whichever is lower.	No	RE projects under these regulations shall be exempted from charges in respect of banking of electricity	Physical agreement
		Net feed in / Net Billing	1 kWp - 1 MWp	100% of the connected load/sanctioned load	Eligible Consumer	Deemed Feasibility approval upto 10 kw capacity RTS	100% of rated capacity	Annual (Financial Year)	surplus energy accounting based on FIT and adjusted with value of energy imported by the consumer. At the end of year, unadjusted amount will be paid by licensee to consumer.	FIT	No	RE projects under these regulations shall be exempted from charges in respect of banking of electricity	Physical agreement
		Group Net Metering	5 kWp - 500 kWp	100% of the connected load/sanctioned load	All Eligible Consumers	Deemed Feasibility approval upto 10 kw capacity RTS	100% of rated capacity	Annual (Financial Year)	Surplus units adjusted against prioritized connections monthly, if ToD applicable, the adjustment will be done in same time block. Annual purchase of unadjusted units.	APPC or FIT, whichever is lower.	No	RE projects under these regulations shall be exempted from charges in respect of banking of electricity	Physical agreement
		Virtual Net Metering	5 kWp - 500 kWp	100% of the connected load/sanctioned load	Residential, GHS, Govt/Local Authorities	Deemed Feasibility approval upto 10 kw capacity RTS	100% of rated capacity	Annual (Financial Year)	Surplus units adjusted against prioritized connections monthly, if ToD applicable, the adjustment will be done in same time block. Annual purchase of unadjusted units.	APPC or FIT, whichever is lower.	No	RE projects under these regulations shall be exempted from charges in respect of banking of electricity	Physical agreement
		Gross Metering	1 kWp - upto 1 MWp	100% of the connected load/sanctioned load	All Eligible Consumers	Deemed Feasibility approval upto 10 kw capacity RTS	100% of rated capacity	Monthly (Billing cycle)	surplus energy accounting based on FIT and adjusted with value of energy imported by the consumer.	FIT	No	RE projects under these regulations shall be exempted from charges in respect of banking of electricity	Physical agreement
15	Maharashtra	Net Metering / Net Billing	Min 1 kW - Max 5 MW	100% of contracted demand / Sanctioned Load	Eligible Consumers	Deemed approved for upto 10 kW capacity	70% but may allow 100% of DT rated capacity after detailed study	Monthly (Units)	Energy set off monthly.	Net units remaining unadjusted lapse at the end of settlement period (FY). Monthly settlement, the unadjusted units shall be settled @ generic tariff approved by commission	No	Grid Support Charges shall not be levied till installations under rooftop arrangement in the State reach 5000 MW	for > 10 kW capacity: technical feasibility study shall be completed within a period of (15) days. Rs. 500 fee against registration for RTS installation. Net metering Agreement executed for 20 years. Energy offset.
		Group Net Metering	Min 1 kW - Max combined SL/CD	100% of combined contracted demand / Sanctioned Load	Eligible Consumers (same consumer, multiple connections)	Deemed approved for upto 10 kW capacity	70% but may allow 100% of DT rated capacity after detailed study	Monthly (Units)	Surplus units adjusted against prioritized connections.	Net units remaining unadjusted lapse at the end of settlement period (FY). Monthly settlement, the unadjusted units shall be settled @ generic tariff approved by commission	No		
		Virtual Net Metering	Min 1 kW - Max combined SL/CD	100% of combined contracted demand / Sanctioned Load	Residential consumers (multi-storied buildings/housing societies)	Deemed approved for upto 10 kW capacity	70% but may allow 100% of DT rated capacity after detailed study	Monthly (Units)	Energy credited based on procurement ratio monthly.	Net units remaining unadjusted lapse at the end of settlement period (FY). Monthly settlement, the unadjusted units shall be settled @ generic tariff approved by commission	No		
		Gross Metering	Min 1 kW - Max 5 MW	100% of contracted demand / Sanctioned Load	Eligible Consumers	Deemed approved for upto 10 kW capacity	70% but may allow 100% of DT rated capacity after detailed study	Monthly	Licensee raises bills on Prosumer for total consumption; gives credit for payment towards total electricity supplied.	@ generic tariff approved by commission	No		
16	Meghalaya	Net Metering	Min: 1 kWp. Max: Governed by service line capacity.	Linked to the sanctioned load and service line capacity of the consumer premises.	Eligible Consumers: Any consumer in the licensee's area of supply using a self-owned or third-party owned RTS.	Up to 10 kW: Deemed accepted. >10 kW: Study in 15 days; feasibility presumed if no outcome is shared.	80% of DT rated capacity; 100% of the feeder capacity.	Annual (Financial Year: April to March).	Exported units (kWh) offset imported units. Surplus carried forward as electricity credit within the settlement period.	Paid at the end of the settlement period at the Feed-in Tariff (FiT) determined by the Commission.		Meter Cost: Borne by the consumer. Infra Cost: Strengthening costs (e.g., DT augmentation) are included in the licensee's revenue requirement (ARR).	check meters mandatory for >20 kW. ToD: Excess generation in any block is treated as off-peak generation.
		Gross Metering	Min: 10 kWp.	Governed by sanctioned load and service line capacity.	Consumers who opt to sell all generated energy to the distribution licensee.	Same as Net Metering.	80% of DT rated capacity.	Annual (Financial Year).	Entire generated energy is injected into the grid and adjusted against the total monthly billing demand.	Paid at the Feed-in Tariff (FiT) determined by the Commission.		Same as Net Metering.	Third-Party Ownership: Permitted. Carry Forward: Excess monthly monetary credit is carried forward; unadjusted credits paid at the end of the FY.
		Group Net Metering (GNM)	5 kW to 5000 kW.	Subject to the eligibility of each participating connection.	Multiple service connections under the same name within the licensee's area of supply.	Same as Net Metering.	80% of DT rated capacity.	Annual (Financial Year).	Surplus units exported are credited to participating connections based on a priority list and pre-agreed ratio.	Unadjusted credits at the end of the FY paid at the FiT rate.		Same as Net Metering.	Priority Revision: Can be revised once per financial year with 3 months' advance notice. ToD Settlement: Surplus units are treated as occurring during the off-peak/normal block for adjustment.
		Virtual Net Metering (VNM)	5 kW to 5000 kW.	Subject to the eligibility of each participating connection.	Participating Consumers (e.g., societies, groups) within the licensee's area of supply.	Same as Net Metering.	80% of DT rated capacity.	Annual (Financial Year).	Entire generated energy is exported and credited to participants' monthly bills based on a procurement ratio.	Unadjusted credits at the end of the FY paid at the FiT rate.		Same as Net Metering.	Share Revision: Participating consumers can change their share once per financial year with 3 months' notice. Disconnection: If a connection is disconnected, its remaining credits are paid at the end of the FY at the FiT.

Rooftop Solar Regulations of States / UTs as on February 2026													
Sr. No.	State/UT	Metering Arrangement	Capacity Limits (Min-Max)	RTS capacity Allowed (% of contracted demand)	Eligible Consumers/Category	Feasibility Approval	DT Capacity/Hosting Restriction	Settlement Period	Settlement Methodology	Settlement Rate for Excess Generation	Requirement of Electrical License of RTS installation	Additional Charges/ Fee	Additional Information
17	Odisha	Net Metering	Up to 500 kW (or SL, whichever is lower)	100% of SL	Eligible Consumers	Deemed approved for upto 10 kW capacity	Not exceed 75% of DT capacity	Annual (Financial Year)	Energy offset monthly. Excess (above 90%) considered free energy.	Excess (above 90%) lapses.	No		
		Gross Metering	Max SL/CD (governed by DT limit)	100% of SL	Eligible Consumers	Deemed approved for upto 10 kW capacity	Not exceed 75% of DT capacity	Monthly	Energy consumed billed at retail tariff; generated at FIT.	Determined by Commission (FIT).	No		
		Group Net Metering	5 kW - 500 kW		Same consumer, multiple connections	Deemed approved for upto 10 kW capacity	Not exceed 75% of DT capacity	Annual (Financial Year)	Surplus adjusted against prioritized connections.	Decided by Commission (FIT).	No		
		Virtual Net Metering	5 kW - 500 kW		Domestic, Specified Public Purpose, Govt/Local Authorities	Deemed approved for upto 10 kW capacity	Not exceed 75% of DT capacity	Annual (Financial Year)	Energy credited based on procurement ratio monthly.	Decided by Commission (FIT).	No		
18	Punjab	Net Metering	1 kWp - 500 kWp	Domestic (Max 100% SL/CD); Others (Max 70% SL/CD)	Domestic (Max 100% SL/CD); Others (Max 70% SL/CD)	Deemed approved for upto 10 kW capacity	80% of DT/feeder rated capacity	Annual (Oct 1 - Sep 30)	Energy offset monthly; excess lapses annually.	Excess lapses annually (no payment). Capped at 90% of consumption.	No	A consumer intending to set up the Rooftop SPV system shall submit the application online along with processing fee of Rs. 50/kW or part thereof of SPV Capacity subject to minimum of Rs. 500/- and maximum of Rs.10000/ to designated officer of the distribution licensee for grant of permission to set-up the plant. The acknowledgement with the registration number shall be generated on submission of application;	
		Net Billing or Net Feed-In	1 kWp (Min) (Max SL/CD)	Domestic (Max 100% SL/CD); Others (Max 70% SL/CD)	Domestic (Max 100% SL/CD); Others (Max 70% SL/CD)	Deemed approved for upto 10 kW capacity	80% of DT/feeder rated capacity	Annual (Oct 1 - Sep 30)	Monetary value of imported energy @ retail tariff vs. exported energy @ FIT.	Excess lapses annually (no payment).	No		
		Gross Metering	50 kWp (Min) (Max SL/CD)	Domestic (Max 100% SL/CD); Others (Max 70% SL/CD)	Domestic (Max 100% SL/CD); Others (Max 70% SL/CD)	Within 15 days of date of acknowledgement	80% of DT/feeder rated capacity	Annual (Settlement cycle)	Energy consumed billed at retail tariff; generated paid at FIT. Single invoice raised in case of amount to be paid by licensee to prosumer, the same will be carry forwarded for next billing cycle for accounting. final Settlement yearly.	FIT approved by Commission.	No		
19	Rajasthan	Net Metering	Min 1 kW - Max 1 MW	100%	Eligible Consumers	Deemed Approval for capacity upto 10 kW for domestic consumer for other RE installation the technical feasibility shall be completed within 15 days	80% of DT capacity (LT). No limit for HT consumers who own DT	Annual (Financial Year)	Energy offset (units) monthly; excess settled annually.	Domestic: Weighted average RE tariff + 25% (Unadjusted net credited units paid credited in 1st month of following year)	Yes	Domestic consumers shall be exempted from banking charges, Transmission charges, Transmission losses, wheeling charges, wheeling losses, cross subsidy surcharge, and additional surcharge	The consumer, who has opted for Net Metering arrangement, shall be allowed to enter into GNM or VNM only after termination of existing connection agreement. - Peer to Peer (P2P) Trading
		Net Billing	Min 1 kW - Max 1 MW	100%	Eligible Consumers		80% of DT capacity (LT). No limit for HT consumers who own DT	Annual (Financial Year)	Monetary settlement based on differential tariff.	Weighted Average RE Tariff + 40% (Annual payment for final settlement).	Yes		
		Group Net Metering	Min 1 kW - Max 1 MW	100%	Domestic and other than domestic category	Feasibility shall be done within 30 days for new application and 15 days for existing net metersing consumers	100% of DT capacity (LT). No limit for HT consumers who own DT	Annual (Financial Year)	Surplus units adjusted against prioritized connections. Settlement rate order of lowest tariff to highest tariff ToD time block.	As specified in Reg. 12.6.1 (a) (Weighted average RE tariff + 25%).	Yes		
		Virtual Net Metering	Min 1 kW - Max 1 MW	100%	Domestic and other than domestic category		100% of DT capacity (LT). No limit for HT consumers who own DT	Annual (Financial Year)	Energy credited based on procurement ratio monthly. Settlement rate order of lowest tariff to highest tariff ToD time block.	As specified in Reg. 12.6.1 (a) (Weighted average RE tariff + 25%).	Yes		
		Behind the meter installation	NA	100%	Domestic and other than domestic category	Must inform the Distribution Licensee	NA	No injection to grid or may opt for net meter	NA	Weighted Average RE Tariff + 40% (Annual payment for final settlement).	Yes		
20	Sikkim	Net Metering	1 kWp - 500 kWp	100% for load upto 10kWp 40% of 10 kW whichever is higher for more than 10 kW sanctioned load	Eligible Consumers	Deemed approval upto 10 kWp	30% of peak capacity of DT	Annual (Financial Year)	Energy settlement (units) monthly; In case of excess in monthly cycle, the same will be carry forwarded for accounting in next billing cycle. Annual paid	Settlement at 70% of APPC rate	No		The Solar Energy Generator may install grid interactive Solar Energy system with or without battery backup.Provided that if the Solar Energy Generator, prefers connectivity with battery backup (full load backup/partial load backup), in all such cases the inverter shall have separate backup wiring to prevent the battery/ Decentralized Generation (DG) power to flow into the grid in the absence of grid supply and manual isolation switch shall also be provided.
		Group Net Metering	1 kWp - 500 kWp		All consumers	Deemed approval upto 10 kWp	30% of peak capacity of DT	Annual (Financial Year)	Energy credited based on priority/ratio.	Set per SSERC (GISS) Regs, 2021 (FIT).	No		
		Virtual Net Metering	1 kWp - 500 kWp		Residential, GHS, Govt/Local Authorities, Institutions, RE Generators	Deemed approval upto 10 kWp	30% of peak capacity of DT	Annual (Financial Year)	Energy credited based on procurement ratio monthly.	Set per SSERC (GISS) Regs, 2021 (FIT).	No		The eligible consumer who proposes to install a solar energy system in his premises shall apply online through the Unified Solar Rooftop Portal of the distribution licensee
21	Tamil Nadu	Net Metering	Max SL/CD (Draft-Less than 1MW)	100%	Domestic (Tariff IA, ID, IE), Public worship (IIC)	Deemed approval upto 10 kWp	90% of DT capacity (LT); 70% of Power Transformer (HT)	Annual (Financial Year)	Energy offset monthly (if ToD, the offset in same time block). Units lapse annually.	Units lapse annually (no payment).	No	Net work charges are leviable for the total energy generated in Net metering and Net billing or Net feed-in mechanisms	Technical feasibility for GISS up to 10kW capacity is exempted (Draft)
		Net Billing or Net Feed-In	Max 999 kW (or SL/CD, whichever is lower)	100%	All categories except Hut & Agriculture	Deemed approval upto 10 kWp	90% of DT capacity (LT); 70% of Power Transformer (HT)	Annual (Financial Year)	calaculation based on Monetary value of exported energy at FIT; credit carried over monthly.	FIT determined by Commission.	No	Net work charges are leviable for the total energy generated in Net metering and Net billing or Net feed-in mechanisms	
		Group Net Metering (Draft Stage)	5 kW - Max SL/CD	100%	Domestic Consumers (Tariff IA)	Deemed approval upto 10 kWp	90% of DT capacity (LT); 70% of Power Transformer (HT)	Annual (Financial Year)	Surplus adjusted against prioritized connections (deducting 7% line loss).	Units lapse annually.	No		
		Gross Metering	150 kWp- 999KWp (draft)	100%	The existing and new consumers of all categories except Low Tension category up to 150 kW		70% of Power Transformer (HT)	Monthly	Generation energy calculated at FIT and settled in consumer electricity bill	FIT determined by Commission.	No	Net work charges are not applicable to Gross metering mechanism;	
		Virtual Net Metering (Draft Stage)	5 kW - Max Contracted demand of participating consumers	100%	Distribution Licensee, Government/Local bodies	Deemed approval upto 10 kWp	90% of DT capacity (LT); 70% of Power Transformer (HT)	Annual (Financial Year)	Energy adjusted from consumption of subsidized categories (deducting 7% line loss/8% banking charges).	Unutilized units paid at 75% of SECI/recent tender rate.	No		
22	Telangana	Net Metering	Min 1 kWp - Max 500 kWp	100%for all except C&I 80% of SL	Domestic & Govt (Max 100% SL); Others (Max 80% SL/CD)	Deemed approval upto 10 kWp	Not exceed 50% of DT rated capacity	Monthly	Energy offset monthly. Excess energy settled @ Lowest solar PPAs/PSAs which may be settled in next billing cycle or can be deposited to consumer account.	Lowest solar PPAs/PSAs/PUAs tariff in preceding FY (Adjusted/Paid).	No	Applicable fee per connection (Rs. 2500 for LT). prosumer shall be exempted from banking charges, wheeling charges, cross subsidy surcharge and additional surcharge.	A duly signed copy of the agreement shall be provided to the consumer/prosumer
		Group Net Metering	Min 10 kWp - Max combined SL/CD (Less than 100 kWp)	100%for all except C&I 80% of SL	LT-I (Domestic) and HT-VI (Townships and Residential Colonies)	Deemed approval upto 10 kWp	Not exceed 50% of DT rated capacity	Monthly	Energy allocated based on priority/ratio; excess settled monthly.	Lowest solar PPAs/PSAs/PUAs tariff in preceding FY (Adjusted/Paid).	No	Applicable fee per connection (Rs. 2500 for LT). Wheeling charges shall be applicable	
		Virtual Net Metering	Min 10 kWp - Max combined SL/CD (Less than 100 kWp)	100%for all except C&I 80% of SL	LT-I (Domestic) and HT-VI (Townships and Residential Colonies)	Deemed approval upto 10 kWp	Not exceed 50% of DT rated capacity	Monthly	Energy allocated based on priority/ratio; excess settled monthly.	Lowest solar PPAs/PSAs/PUAs tariff in preceding FY (Adjusted/Paid).	No	Applicable fee per connection (Rs. 2500 for LT). Cross subsidy surcharge and additional surcharge shall be applicable	

Rooftop Solar Regulations of States / UTs as on February 2026													
Sr. No.	State/UT	Metering Arrangement	Capacity Limits (Min-Max)	RTS capacity Allowed (% of contracted demand)	Eligible Consumers/Category	Feasibility Approval	DT Capacity/Hosting Restriction	Settlement Period	Settlement Methodology	Settlement Rate for Excess Generation	Requirement of Electrical License of RTS installation	Additional Charges/ Fee	Additional Information
		Gross Metering	Min 1 kWp - Max 1 MWp	100%for all except C&I 80% of SL	Domestic & Govt (Max 100% SL); Others (Max 80% SL/CD)	Deemed approval upto 10 kWp	Not exceed 50% of DT rated capacity	Monthly	Licensee purchases entire power generated.	Lowest solar PPAs/PSAs/PUAs tariff in preceding FY.	No	Applicable fee per connection (Rs. 2500 for LT).	
23	Tripura	Net Metering	1 kWp - 10 kWp		Domestic, Irrigation, Water Works (LMV)		Set per Reg. Part C (6) of TERC (NM for GISS) Regs, 2016	Quarterly	Units offset; Excess above 100 units paid quarterly.	FIT paid quarterly (capping of 3.8 units/kWp/day).	No		
		Group Net Metering	1 kW - 1 MW		All consumers		Set per Reg. Part C (6) of TERC (NM for GISS) Regs, 2016	Quarterly	Units offset (follows NM settlement). Surplus adjusted against prioritized connections.	NM settlement rate.	No		
		Virtual Net Metering	1 kW - 1 MW		Domestic, GHS, Govt/Local Authorities, Institutions, RE Generators		Set per Reg. Part C (6) of TERC (NM for GISS) Regs, 2016	Quarterly	Energy credited based on procurement ratio. Follows NM settlement.	NM settlement rate.	No		
		Gross Metering	>10 kWp - 500 kWp		All consumers		Set per Reg. Part C (6) of TERC (NM for GISS) Regs, 2016	Quarterly	Energy consumed billed at retail tariff; generated paid at FIT.	FIT paid quarterly.	No		
24	Uttarakhand	Net Metering	Min 1 kW - Max 1 MW	100% or irrespective of loan in case of domestic consumer	Eligible Consumers	Deemed approved for upto 10 kW capacity	Not exceed capacity of single transformer	Annual (Financial Year)	Energy offset monthly; excess lapses annually.	Generic tariff or bid tariff. Banking charges @ 8% in kind.	No		
		Net Billing	Min 1 kW - Max 1 MW	100% or irrespective of loan in case of domestic consumer	Eligible Consumers	Deemed approved for upto 10 kW capacity	Not exceed capacity of single transformer	Annual (Financial Year)	Monetary value calculation; credit carried over monthly.	Generic tariff or bid tariff. Banking charges @ 8% in kind.	No		
		Group Net Metering	5 kW - 75 kW	100% or irrespective of loan in case of domestic consumer	Domestic, Govt/Local Authorities	Deemed approved for upto 10 kW capacity	Not exceed capacity of single transformer	Annual (Financial Year)	Energy offset in similar time blocks.	Generic tariff or bid tariff, whichever is lower (Annual settlement). Banking charges @ 8% in kind.	No		
		Virtual Net Metering	5 kW - 75 kW	100% or irrespective of loan in case of domestic consumer	Domestic, Govt/Local Authorities	Deemed approved for upto 10 kW capacity	Not exceed capacity of single transformer	Annual (Financial Year)	Energy credited based on share/time block.	Generic tariff or bid tariff, whichever is lower (Annual settlement). Banking charges @ 8% in kind.	No		
25	Uttar Pradesh	Net Metering	Min 1 kW - Max 2 MW	100%	Domestic (LMV-1), Metered Agriculture (LMV-5), Public/Private Institutions (LMV-4A, LMV-4B, HV-1)		Not exceed 75% of DT/feeder capacity	Annual (Financial Year)	Energy offset monthly (Settlement in same time block); excess units paid annually.	Rs. 2.0 / kWh	No	All the eligible consumers under gross metering scheme, net metering scheme or net billing / net feed-in scheme, whether self-owned or third party owned, shall be exempted from wheeling and cross subsidy surcharge	
		Net Billing or Net Feed-In	Min 1 kW - Max 2 MW	100%	Any category (Prosumer)		Not exceed 75% of DT/feeder capacity	Annual (Financial Year)	Monetary value calculation; credit carried over monthly.	Net billing/Net feed-in Tariff (Same as Gross Metering Tariff).	No		
		Virtual Net Metering	NA	NA	NA	NA	NA	NA	NA	NA	NA		NA
		Gross Metering	Min 1 kW - Max 2 MW	100%	Any category (Prosumer)		Not exceed 75% of DT/feeder capacity	Monthly	Licensee reimburses Prosumer for injected electricity.	Weighted Average of large scale Solar Plant (>= 5MW) + 25%).	No		
26	West Bengal	Net Metering	1 kWp to 500 kWp.	Up to 100% (Not to exceed sanctioned load or 500 kW, whichever is lower).	Prosumers with sanctioned load of at least 1 kW.	Up to 10 kW: Deemed accepted. >10 kW: Study in 15 days; outcome in 20 days.	Cumulative RTS capacity shall not exceed 100% of the feeder and/or DT capacity.	Financial Year (1st April to 31st March).	Energy exported (kWh) is subtracted from energy imported. Surplus units carried forward to subsequent billing periods.	Reset to zero at the end of the settlement period (no payment for remaining surplus units).	No	Application Fees: LV/MV: ₹1000 HV/EHV: ₹5000.	Prosumer bears infrastructure upgradation costs for >10kW Connectivity is allowed at the same voltage level at which the consumer is supplied.Settlement for ToD Consumers: For Net Metering, electricity consumption in each time block is first offset against generation in the same time block, then against lower tariff blocks sequentially
		Net Billing (Net Feed-in)	1 kWp to Sanctioned Load.	Up to 100% of sanctioned load.	Prosumers with sanctioned load of at least 1 kW.	Same as Net Metering.	Same as Net Metering.	Financial Year (1st April to 31st March).	Monetary value of imported energy (@ retail tariff) vs. exported energy (@ FIT). Export credit carried forward to next bill.	Reset to zero at the end of the settlement period (no payment for remaining monetary credit).		Application Fees: LV/MV: ₹1000 HV/EHV: ₹5000.	Prosumer bears all costs related to setting up the system, including meters. No interest on carried forward credit.
		Gross Metering	1 kWp to Sanctioned Load.	Up to 100% of sanctioned load.	Prosumers with sanctioned load of at least 1 kW.	Same as Net Metering.	Same as Net Metering.	Financial Year (1st April to 31st March).	Total energy consumed is billed at retail tariff; total energy generated is credited at FIT. Net credit carried forward.	Paid to the prosumer by the Distribution Licensee at the end of the settlement period.		Application Fees: LV/MV: ₹1000 HV/EHV: ₹5000.	Requires two separate energy meters (consumer meter and generation meter). Prosumer bears infrastructure upgradation costs for >10kW.
27	Other UTs (Goa, A&N, Chandigarh, DNH & DD, Lakshadweep, Puducherry)	Net Metering	Up to 500 kWp	100% of Contracted Demand	Eligible Consumer	Deemed approved for upto 10 kW capacity	Not exceed 75% of DT capacity	Annual (Financial Year)	Energy settlement (units) monthly, timeblock settlement in case of ToD; Annual purchase of unadjusted units.	APPC or FIT, whichever is lower.	No		
		Group Net Metering	5 kWp - 500 kWp	100% of sum of contracted demand	Eligible Consumers	Deemed approved for upto 10 kW capacity	Not exceed 75% of DT capacity	Annual (Financial Year)	Surplus units adjusted against prioritized connections monthly, timeblock settlement in case of ToD.	APPC or FIT, whichever is lower.	No		
		Gross Metering	Up to 500 kWp	100% of Contracted Demand	Eligible Consumers	Deemed approved for upto 10 kW capacity	Not exceed 75% of DT capacity	Annual (Financial Year)	Energy cost offset monthly; Annual purchase of unadjusted units.	APPC or FIT, whichever is lower.			
		Net billing / Net Feed In	>500 kWp		Eligible Consumers		Not exceed 75% of DT capacity	Monthly settlement / Annual (Financial Year)	Settlement based on monetary benefit value of imported and exported by consumer (Imported value based on applicable tariff and exported based on FIT	FIT rate			Prosumers availing net-billing or net feed-in, the time-of-the-day tariffs may be introduced whereby Prosumers are incentivised to install energy storage for utilization of stored solar energy by them or feeding into the grid during peak hours thus helping the grid by participating in demand response of the Distribution Licensee:
		Virtual Net Metering	5 kWp - 500 kWp	100% of sum of contracted demand	Residential, GHS, Govt/Local Authorities	Deemed approved for upto 10 kW capacity	Not exceed 75% of DT capacity	Annual (Financial Year)	Energy credited based on procurement ratio monthly.	APPC or FIT, whichever is lower.	No		
28	Madhya Pradesh	Net Metering	1 kWp - 500 kWp	100%	All eligible consumers	Deemed approved for upto 10 kW capacity	Not exceed 80% of DT capacity	Annually	Energy offset; Excess credited annually	Energy offset in same time block in case of ToD. Unadjusted will be settled @lowest tariff discovered for Solar / Wind in preceding financial year.	No	Exempted from banking, wheeling, cross subsidy and additional charges	Physical agreement
		Group Net Metering	1 kW - 100 kWp	100% of sum of contracted demand	All eligible consumers	Deemed approved for upto 10 kW capacity	Not exceed 80% of DT capacity	Annually	Energy offset with the prosumer and participating consumers.	Energy offset with the prosumer in same time block in case of ToD, excess to the prosumer will be offset with participating consumer.	No	Wheeling and lossess will be charged as per voltage level	
		Virtual Net Metering	1 kW - 100 kWp	100% of sum of contracted demand	All eligible consumers	Deemed approved for upto 10 kW capacity	Not exceed 80% of DT capacity	Annually	Energy offset; Excess credited annually	Energy offset. If exported energy is druing off-peak hrs, the settlement will be done on non-ToD Hhrs. Excess to the billing period will be next settled with off-peak hrs of consumer is under ToD. Unadjusted energy will be paid @lowest tariff of solar / wind	No	Except Banking, Cross subsidy, wheeling, additional surcharge, losses will be charged as per voltage level	

Rooftop Solar Regulations of States / UTs as on February 2026													
Sr. No.	State/UT	Metering Arrangement	Capacity Limits (Min-Max)	RTS capacity Allowed (% of contracted demand)	Eligible Consumers/Category	Feasibility Approval	DT Capacity/Hosting Restriction	Settlement Period	Settlement Methodology	Settlement Rate for Excess Generation	Requirement of Electrical License of RTS installation	Additional Charges/ Fee	Additional Information
		Gross Metering	1 kWp - 1000 kWp	100%	All eligible consumers	Deemed approved for upto 10 kW capacity	Not exceed 80% of DT capacity	Annually	Energy cost offset monthly; Excess credited annually	Exported Energy cost calculated @lowest tariff discovered for Solar / Wind in preceding financial year.	No	Exempted from banking, wheeling, cross subsidy and additional charges	

Disclaimer: This document has been compiled based on the regulations, policies, and guidelines issued by various States and Union Territories regarding residential rooftop solar installations. While every effort has been made to ensure accuracy and completeness, there may be inadvertent errors or discrepancies. In case of any inconsistency, users are advised to refer to the respective State/UT's official regulation, notification, or order as the final and may report to rts-mnre@gov.in
